

## **Skarabeos Jacket OI**

**Skarabeos Jacket OI is a unisex jacket for the urban nomad. It will keep you warm and protected against the elements**

The jacket is waterproof and made of sustainable materials.

It consists of an outer jacket made of 100% recycled polyester, which is waterproof. All seams are additionally taped to prevent water from getting inside through the seams. The jacket has two large, waterproof outer pockets and a large hood with drawstring and extra wool lining. The length of the jacket reaches over the knees so that the legs are protected from rain even when sitting or cycling. The material of the outer jacket comes from Germany.

We have completed this highly functional outer layer with an inner jacket made from a very traditional woolen textile from Austria, called Loden. This material regulates body temperature very well, so it will keep you comfortably warm on cold and windy days. This inner jacket can be unbuttoned and used as an extra jacket. It has two pockets in the outer area and two pockets inside with zipper, where you can stow small everyday things safely. As buttons we use GOTS certified horn buttons from a German manufacturer.

Skarabeos Jacket OI is made in Europe.
